

RETRIEVER **PAPERBARK**

Retriever's **PaperBark** is a light weight corporate solution for managing electronic forms. The native app allows users to remotely interact with and capture data against corporate forms, securely from their mobile device.

Paperbark's flexibility allows enterprise to configure the solution to meet business needs in a matter of hours. Form data is seamlessly captured and delivered to backend systems, streamlining processes, and reducing wasteful double-data entry that comes with paper-based forms.

Features

- ✓ Group users to manage form accessibility
- ✓ Submit form data and get reports emailed back instantly
- ✓ Create & update forms using the simple Retriever FormBuilder tool
- ✓ Customize the mobile app & reports with company logos & colours
- ✓ Leverage device functionality for data capture (e.g. camera, GPS, barcode scanners & attachments)
- ✓ Ability to capture GPS & time when form is commenced, completed or cancelled
- ✓ Submitted form data can be sent to back office, stored on the device or converted into PDF for email distribution (or a combination).

-  **CREATE E-FORMS**
-  **DISTRIBUTE E-FORMS**
-  **ELIMINATE PAPERWORK**
